PROFESSIONAL SUMMARY

AI Generalist who applies Generative AI, prompt engineering and AI tools to research, analytics, automation and content workflows. Certified through the Google AI Professional Certificate and the be10x AI Generalist program, with applied GenAI workflow automation practice from the Vista Equity Partners AI in Action job simulation. Builds and tests AI-assisted applications, from SBMA AI, a published AI data analysis command center, to a no-code Python data analysis tool, and evaluates AI output for accuracy, reliability and responsible use.

CORE SKILLS

AI & Generative AI: Artificial Intelligence, Generative AI, Prompt Engineering, AI Research, Responsible AI
AI Applications: AI Workflow Automation, AI Agents, AI App Building, AI-powered Research, AI Content Creation, AI-assisted Data Analysis
AI Tools: ChatGPT, Claude, Gemini, Perplexity, NotebookLM, Google AI Studio, Microsoft Copilot
Data & Analytics: Python (Pandas, Matplotlib), Data Visualization, Data Reconciliation, Insight Summarization
Web & Deployment (AI-assisted): HTML, CSS, JavaScript, Node.js, Express, PostgreSQL, GitHub
Research & Thinking: Information Research, AI Tool Evaluation, AI Output Verification, Critical Thinking, Problem Solving

AI PROJECTS

AI-Powered Corporate Data Analyzer — *Python desktop application*

- Developed a desktop data analysis app in Python (Pandas, Tkinter, Matplotlib) through prompt engineering and AI-assisted coding.
- Enabled non-technical users to analyze data and create charts without code, with Excel, CSV and PNG export; packaged as a standalone executable.

SBMA AI — AI-Powered Business Intelligence Command Center — *Published AI application* 2026

- Built and published an AI data analysis command center (React, TypeScript, Express, Gemini API) where a deterministic engine computes every metric and Gemini only interprets pre-calculated results.
- Delivered data intake, profiling, quality scoring, a plain-language query planner, AI Analyst, charts and reports; 11/11 automated diagnostics pass, including an 8,000-row benchmark.

The AI Desk — AI Generalist Portfolio — *Personal portfolio site* 2026

- Designed and built a responsive, data-driven portfolio in HTML, CSS and JavaScript with Claude, featuring topic filtering, global search and dark/light themes.
- Built a scripted on-site assistant that answers questions from site data, with an integration point for a future LLM API.

CERTIFICATIONS & JOB SIMULATIONS

Google AI Professional Certificate | Google Oct 2026

Generative AI, prompt engineering, AI-powered research, AI for data analysis, AI app building and deployment, responsible AI. Tools: Gemini, NotebookLM, Google AI Studio, Google Workspace AI.

AI Generalist, AI Career Accelerator Program (Certificate of Mastery) | be10x Aug 2026

AI fundamentals and ecosystem, AI product building, AI in data analytics, AI agents and autonomous systems, AI branding and leadership.

Vista Equity Partners AI in Action Job Simulation | Forage (Job Simulation) Feb 2026

- Applied a four-part prompt framework (Ask, Context, Examples, Desired Output) to turn customer NPS feedback into executive-ready insights, improving AI output clarity and relevance by more than 50% through iterative refinement.
- Designed and tested GenAI workflows for news aggregation, data reconciliation and qualitative insight summarization in ChatGPT and Microsoft Copilot, with guardrails for accuracy and reliability.

EDUCATION & LANGUAGES

MBA, Data Science and Business Analytics — *DY Patil University* 2026 – 2028 (expected)

B.Sc., Microbiology — *Dhote Bandhu Science College, Gondia, Maharashtra* 2024

Languages: English, Hindi, Marathi, Gujarati, Tamil, Telugu, Kannada
